REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The claims have been allowed because JP 2002-336,653 does not teach the use of the hopcalite catalyst. In contrast, JP 2002-336,653 in its claim 1 discloses the use of a "mixture or the multiple oxide of a manganic acid ghost, and iron, a cerium, europium, a lanthanum and at least one sort of oxides of the copper". The "Example" on paragraph no. 0121 discloses that the "... in the above-mentioned example, as a catalyst, although it is made to carry out, the catalyst using what was constituted with manganese, iron, and a cerium used by this invention should contain the mixture or the multiple oxide of a manganic acid ghost, and iron, a cerium, europium, a lanthanum and at least one sort of oxides of the copper". Further, JP 2002-336,653 does not disclose the treatment of air polluted with cigarette smoke. In contrast, JP 2002-336,653 discloses the removal of nitrogen oxides from a gas (claim 7); the removal of unburnt fuel and hydrocarbon out of a combustion gas (claim 8); the removal of dioxin out of a combustion gas (claim 9) and the removal of chlorofluorocarbons out of a gas (claim 10).

Any comments considered necessary by the applicants must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
